EL PASO, TEXAS: A man is hospitalized with life threatening injuries after he drives his truck off of the roadway onto the center median and rolls the truck several times. Special Traffic Investigators responded to assist Central Patrol after it was learned that the driver had sustained life threatening injuries as a result of being ejected in a roll over collision. Investigators have learned that the male was driving a 2004 Ford F150, southbound on US 54 where it divides by Pershing at 1:20 a.m., Wednesday, March 5th. The truck drove onto the median, losing control, and rolled over causing the male driver to be ejected from the truck. The driver was transported to University Medical Center (UMC) with severe head injury. STI believes at this point of the investigation that speed and driver inattention may be factors. This investigation continues.
